Atty Dkt. No.: STAN-353 USSN: 10/599,310

AMENDMENTS TO THE CLAIMS:

1. (previously presented) A method for translation of mRNA to produce polypeptides,

the method comprising:

synthesizing said polypeptides in a cell-free reaction mixture of greater than about 15  $\mu$ l

volume, comprising an antifoam agent at a concentration of at least 0.00007%, and not more

than 0.007% by weight, wherein the antifoam agent is other than a detergent.

2. (canceled)

3. (previously presented) The method of Claim 1 wherein said synthesizing also

comprises transcription of mRNA from a DNA template.

4. (canceled)

5. (previously presented) The method of Claim 1, wherein said reaction mix comprises a

volume of greater than 100 μl.

6. (previously presented) The method of Claim 5, wherein said reaction has a yield that

is at least about 90% of the yield in a comparable reaction of less than 15 μl volume.

7-12. (canceled)

13. (previously presented) A method for translation of mRNA to produce polypeptides,

the method comprising:

synthesizing said polypeptides in a cell free reaction mixture of greater than about 15 µl

volume, comprising:

a cell extract; a template for production of the mRNA and/or polypeptides; monomers for

the mRNA and/or polypeptides to be synthesized; and such co-factors, enzymes and other

reagents that are necessary for the synthesis; and an anti-foam agent at a concentration of at

least 0.00007%, and not more than 0.007% by weight, wherein the antifoam agent is other than

a detergent.

2

Atty Dkt. No.: STAN-353

USSN: 10/599,310

14-15. (canceled)

16. (previously presented) A reaction mixture for cell-free translation of mRNA to

produce polypeptides, comprising:

a cell extract; mRNA; monomers for the polypeptide to be synthesized; and such co-

factors, enzymes and other reagents that are necessary for the synthesis; and an anti-foam

agent other than a detergent at a concentration of at least 0.00007%, and not more than

0.007% by weight.

17. (previously presented) The method of Claim 1 wherein oxidative phosphorylation is

activated in the cell-free reaction mixture.

18. (previously presented) The method of Claim 1 wherein said reaction mixture

comprises a volume of greater than 1000 µl.

19. (previously presented) The method of Claim 1, wherein said synthesizing is

performed in a reactor.

20. (previously presented). The method of Claim 19, wherein the reactor is a bubble

reactor.

21. (canceled)

22. (previously presented) The method of Claim 1, wherein the antifoam agent is

selected from alkyl polyoxyalkylene glycol ethers; siloxane polymers; and mixtures of organic

non-silicone polypropylene based polyether dispersions.

23. (previously presented) The method of Claim 13, wherein the antifoam agent is

selected from alkyl polyoxyalkylene glycol ethers; siloxane polymers; and mixtures of organic

non-silicone polypropylene based polyether dispersions.

3

Atty Dkt. No.: STAN-353 USSN: 10/599,310

24. (previously presented) The reaction mixture of Claim 16, wherein the antifoam agent is selected from alkyl polyoxyalkylene glycol ethers; siloxane polymers; and mixtures of organic non-silicone polypropylene based polyether dispersions.
